FACILITY

facil_id

The diagram illustrates two data structures, **cddodins** and **cmgenmet**, and their associated data points.

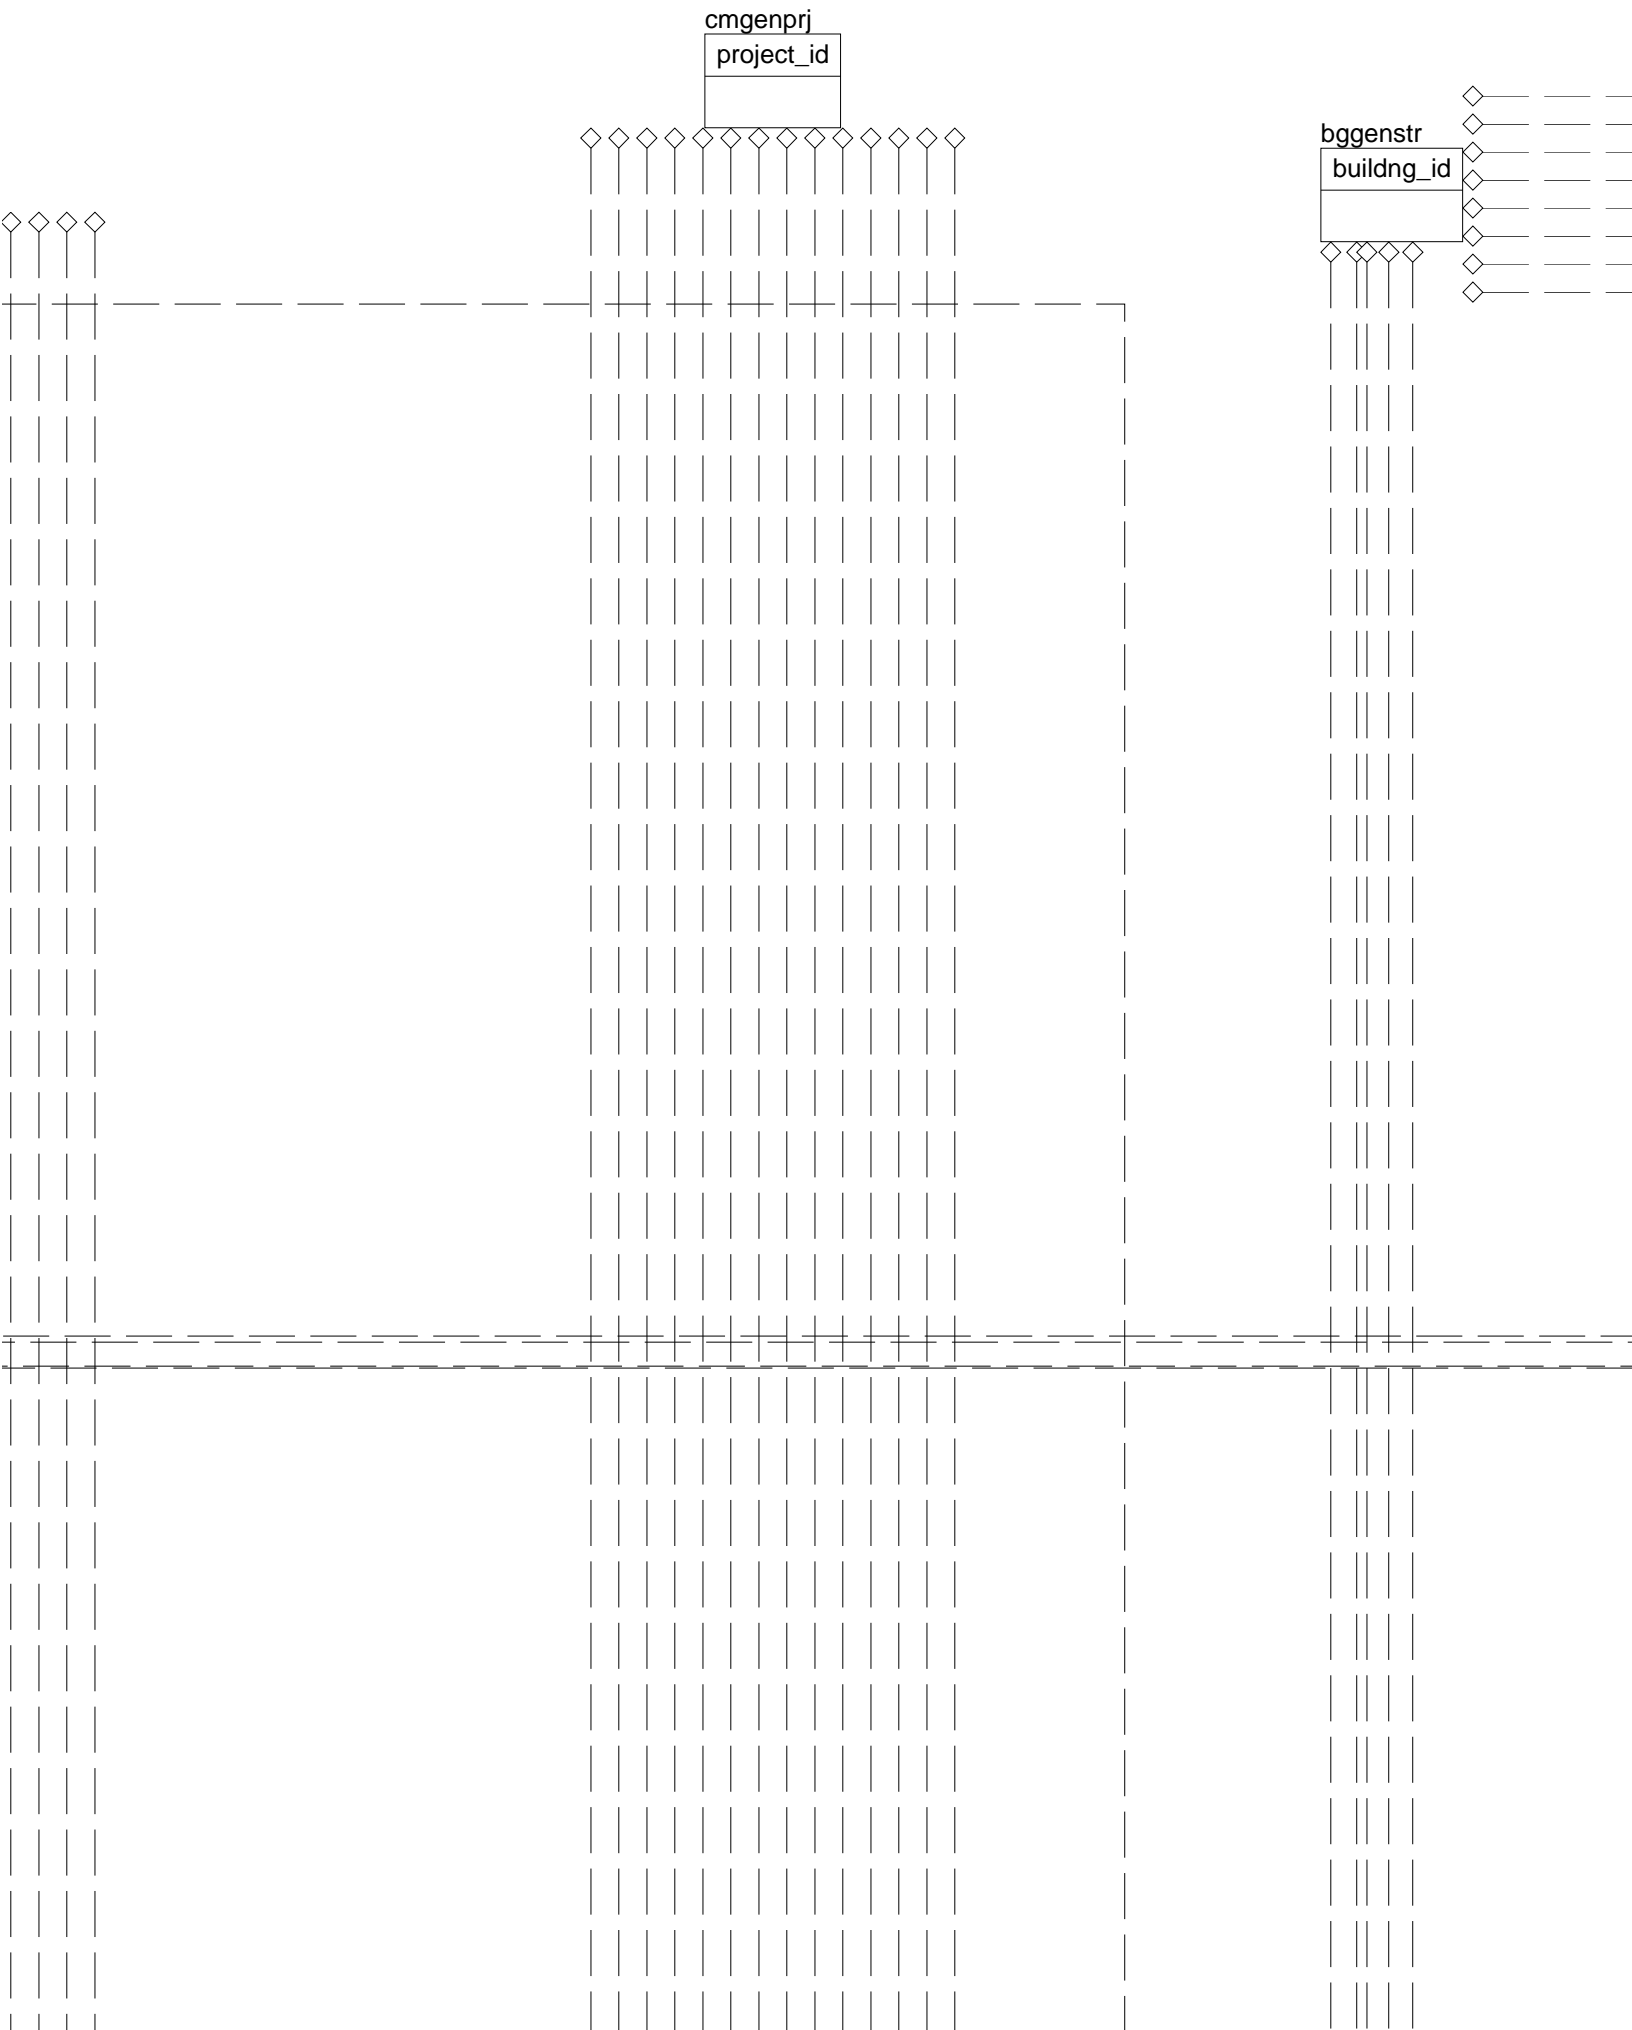

cddodins is defined by the attributes:

- instln_id

cmgenmet is defined by the attribute:

- meta_id

The diagram shows a grid of data points for both structures. The **cddodins** grid is on the left, and the **cmgenmet** grid is on the right. The grids are separated by a vertical dashed line. The **cddodins** grid has 10 columns and 10 rows, while the **cmgenmet** grid has 10 columns and 10 rows. The data points are represented by small diamond shapes at the top of each column and a series of vertical lines for each row. The **cddodins** grid has a header row with the attribute **instln_id**, and the **cmgenmet** grid has a header row with the attribute **meta_id**. The grids are connected by a series of horizontal dashed lines, indicating a relationship between the two structures.
