Description

Abstract: The Identified Sites coverage, used to support the environmental quality program, references types and concentrations of contaminants, contaminated media and responsible parties across the state. The coverage data is current as of the publication date. The KDHE/BER operational database is a dynamic database.

Purpose: This coverage was developed to improve program staff reporting capabilities and to establish a stable reference for continued environmental assessment.

Access Constraints: None

Use Constraints: Data is current as of publication date. KDHE/BER is not responsible for database integrity following download and publication. To be used at minimum scale of 1:100,000. Please be advised that the Kansas Open Records Act (KORA), K.S.A. 45-215 et seq. and K.S.A. 21-3914, prohibit the commercial use of the owner list by any person. Any person who receives a list of names and addresses for the purpose of selling or offering to sell any property or service to listed persons may be found guilty of a Class C misdemeanor except in the limited circumstances provided for in K.S.A. 21-3914. Data Quality Information

Lineage:/Source Information

Type of source media: LEO conversion of legal description

Source scale denominator: 100,000

Source citation abbreviation: KDHE

Attribute Accuracy:/Attribute Accuracy Value: Attribute database reflects internal KDHE QAQC controls for related source materials as of publication date

Attribute Accuracy Report: Where applicable, KDHE database QAQC includes data entry validity checks for acceptable ranges and coincident spatial references. Located point, line and polygon resources are cross-referenced against a standard series of administrative and physical boundary files that include county, KDHE district, hydrologic basin, hydrologic unit code 8 and 11. HUC association error for STATE_SWIM is an estimated five percent

Positional Accuracy:/Horizontal Positional Accuracy:/Horizontal Positional Accuracy Value: LEO conversion horizontal accuracy is less than or equal to one-half the hypotenuse of a PLSS section unit.

Horizontal Positional Accuracy Report: Where applicable, KDHE database QAQC includes verification of coincident legal description conversions and county administrative units. Legal descriptions include township, range, section and up to four quarter-section designations.
