Description

Abstract: KR305b 1994 coverage, used to support water quality programs, references water quality use designations and support levels. This coverage is available for the Kansas Lower Republican drainage basin. The coverage data is current as of the publication date. The KDHE/OSS operational database is a dynamic database.

Purpose: This coverage was developed to improve program staff reporting capabilities to comply with the Clean Water Act, to relate this data with EPA's hydrologic reach reference system, and to establish a stable reference for continued environmental monitoring assessment.

Access Constraints: None

Use Constraints: Data is current as of publication date. KDHE/BER is not responsible for database integrity following download and publication. To be used at minimum scale of 1:100,000. Contact KDHE for more information.

Data Quality Information

Lineage/Source Information

Type of source media: KDHE 305b water quality data, EPA-RF3 hydrologic data

Source scale denominator: 100,000

Source citation abbreviation: KDHE, EPA

Attribute Accuracy/Attribute Accuracy Value: Attribute database reflects internal KDHE QAQC controls for related source materials as of publication date

Attribute Accuracy Report: Where applicable, KDHE database QAQC includes data entry validity checks for acceptable ranges and coincident spatial references.

Positional Accuracy/Horizontal Positional Accuracy/Horizontal Positional Accuracy Value: See EPA-RF3 metadata entry and National Map Accuracy Standard

Horizontal Positional Accuracy Report: No more than 10% of features shall be more than 1/50th of an inch from their intended location on maps of scale smaller than 1:20,000

Spatial Data Organization Information

Direct Spatial Reference Method/Raster or Vector Object Type: Vector

Spatial Reference Information

Horizontal Coordinate System Definition/Map Projection: Lambert Conformal Conic

1st Standard Parallel: 33 0 0.000

2nd Standard Parallel: 45 0 0.000

Central Meridian: -98 15 0.000

Latitude of Projection Origin: 36 0 0.000

False Easting: 0 meters

False Northing: 0 meters

Geographic/Map Coordinate Units: Meters

Entity and Attribute Information

Overview Description/Entity and Attribute Overview:

CU Hydrologic Catalog Unit. *

SEG Segment. *

MILE Mile reference. *

BASIN River basin code.

MON Monitoring station.

EVAL Evaluation station.

OWNR Outstanding natural resource waters.¹

AL Support for aquatic life.²

CR Support for contact recreation.³

DWS Support for drinking water supplies.³

FP Support for food procurement.³

GR Support for ground water recharge.³

IWS Support for industrial water supply.³

IR Support for irrigation water supply.³

LW Support for livestock water.³

S_ALA Level of support for aquatic life - acute.

S_ALC Level of support for aquatic life - chronic.

S_CR Level of support for contact recreation.⁴

S_NC Level of support for non-contact recreation.

S_DW Level of support for drinking water.

S_IRR Level of support for irrigation.

S_LV Level of support for livestock.

RFLAG Reach segment. *

OWFLAG Open water segment. *

REACHTYPE Reach description. *

PNAME Principle name. *

RFORGFLAG Origin. *

LN1AT2 DLG line attribute. *

LN2AT2 DLG line attribute. *

¹ X = designated as outstanding natural resource water

² E = Expected; S = Special; R = Restricted

³ X = Designated for this use; O = Not designated for this use

⁴ NA = Non-Attainable
