Description

Abstract: Compiled source materials to represent surface water value

Purpose: Resource element dataset for the KATS system to target valuable or vulnerable water resources for water quality assessment evaluation.

Access Constraints: None

Use Constraints: This tool should only be used for preliminary assessment and is inappropriate for small-scale analyses. Data is current as of publication date. KDHE and KWO are not responsible for database integrity following download and publication. To be used at minimum scale of 1:100,000.

Data Quality Information

Lineage:/Source Information

Type of source media: DLG, Scanned Maps, EPA RF-3

Source scale denominator: 1:500,000, 1:100,000, 1:24,000

Source citation abbreviation: Kansas Department of Health and Environment; Kansas Department of Agriculture, Division of Water Resources; Kansas Water Office; Kansas Department of Agriculture, Division of Statistics

Attribute Accuracy:/Attribute Accuracy Value: Variable dependent upon currency of source material. See KATS project documentation for component synthesis procedures.

Attribute Accuracy Report: Irrespective of source or form, raw values for each water resource element were aggregated within a HUC 11 unit and normalized to a 5-point nominal scale, see normalized or ranked values. See KATS project documentation for component synthesis procedures.

Positional Accuracy:/Horizontal Positional Accuracy:/Horizontal Positional Accuracy Value: not applicable

Horizontal Positional Accuracy Report: All water resource elements used in the KATS system have been aggregated to HUC 11 areal units. Refer to HUC 11 metadata report for horizontal accuracy criteria.
